Sint-Gillis-Waas, Belgium

Profile

Passionate technical sound designer and music producer with an insatiable curiosity.

I started making electronic music in 2013. This is what lead me to synthesizing my own sounds and eventually ending up where I am today:

A highly technical sound designer, electronic music composer, and (audio) programmer.

I especially enjoy the more technical side of things. When it comes to music and sound design I love synthesizing, and programming-wise I like to challenge myself in more low level systems.

Education

Human Sciences, Forum Da Vinci, Sint-Niklaas

09/2015–06/2021

Graduated, top scoring for Maths and Physics

Physics & Astronomy, UGent, Gent
